

**IMPORTANT INFORMATION REGARDING MESOTHELIOMA
AND ASBESTOS RELATED INJURIES**

In the approximately twenty three years since the law was changed in New York to allow NYC Building Trades persons to file lawsuits for asbestos related injuries, Colleran, O'Hara & Mills and its Trial Counsel, Weitz & Luxenberg, have assisted thousands of your members in obtaining the best settlements and verdicts for their injuries.

The litigation has now reached a point where there are still numerous viable defendants but, as importantly, there are numerous bankruptcy trusts in existence which have billions of dollars available to compensate workers exposed to and injured by asbestos.

Our goal, through the Building Trades Council and all of its affiliates, is to re-educate the union leadership and the union membership of the relationship between asbestos exposure and the large number of malignancies which are suffered by your members every day. We also think it important to make them aware that our joint program with Weitz & Luxenberg is the only one in the country which allows Building Trades Members to access the most successful asbestos litigation firms in the country at a reduced contingency fee of twenty five (25%) percent.

Thank you as always for your attention to and assistance with this effort.
